SAVE WILLIAMSTOWN

Does the Developer care about the nearby community
ASBESTOS ALERT - Port Phillip Woollen Mills

Monday, 16 December 2013

NOW the Asbestos team moves in.. when the air has been polluted with dry dust.

Having spent MONTHS clearing the site - going beyond the VCAT decision about Archaeological research whenever MANMADE SURFACE is disturbed - another reason why care should have been

taken on MAN MADE SURFACE and STRUCTURES...

Why did HBC use SECONDARY CONSENT to change the VCAT decision without notice to the objecting parties.. They did not need to - this site should have been handled properly and respectfully

2 months of clearing and carrying materials in open trucks past Schools and Child Care Centres because Worksafe OH & S wouldn't allow workers to climb and cover the massive trucks...

NOW the Asbestos team moves in.. when the air has been poluted with dry dust.

Where is Council and EPA and Worksafe and WHY haven't nearby residents been warned and streets closed off..

Pictures to prove the clearing is done and after the fact Asbestos removal... THE WRONG WAY ROUND ... they should have found and removed under proper conditions - the asbestos first

Many of us have walked past - what inhalations did we have and on what dates.. Digital photos will record those times and moments for future reference. Storms in the last two months have blown material to houses all around and on the transport routes..

What about the customers of the Titanic Theatre Restaurant.

Why are there no protection covers over everywhere they suspected Asbestos.. This is a product that even a miniscule amount can lead to health issues in the long term future.
